CARE INSTRUCTIONS VEHICLE GRAPHICS & WRAPS

- 1 Please allow **5 days** from collection **before cleaning**.
- 2 **Hand wash only**, use a high quality sponge or wash mitt. **Do not use a pressure washer** or automatic washes.
- 3 Avoid using harsh cleaning products or chemicals.
- 4 Clean vehicle from top to bottom, allowing dirt and debris to fall downward to prevent scratches.
- 5 Dab stubborn dirt areas with the sponge, **do not scrub**.
- 6 Remove any fuel spillages, bird mess & tree sap straight away.

This is only a guideline and we recommend that all methods and chemicals are tested on an inconspicuous area first.

CARING FOR YOUR SIGNAGE & VEHICLE GRAPHICS

Care for your vehicle graphics like you would any fine paint finish. Use high quality products designed specifically for car care and these cleaning and maintenance procedures will help keep your vehicle graphics looking their best.

WASH REGULARLY

- Wash whenever the car appears dirty. Contaminants allowed to remain on the graphic may be more difficult to remove during cleaning.
- Rinse off as much dirt and grit as possible with a spray of water.
- Use a wet, non-abrasive detergent such as 3M™ Car Wash Soap 39000 or Meguiar's NXT Generation® Car Wash or Deep Crystal® Car Wash and a soft, clean cloth or sponge.
- Rinse thoroughly with clean water. To reduce water spotting, immediately use a silicone squeegee to remove water and finish with a clean microfibre cloth.

IMPORTANT NOTE- *We do not recommend using wax or other ceramic coatings on vehicle graphics.*

AUTOMATED CAR WASHES

Vinyl wraps may be run through car washes. Touch less car washes are the best for graphic care. Use of brush car washes (depending upon the frequency and quality of brush) may cause dulling/scratching/lifting edge of the graphics. .

PRESSURE WASHING

Although hand washing is the preferred cleaning method, pressure washing may be used under specific conditions.

- Ensure the water pressure is kept below 2000 psi (14 MPa).
- Keep water temperature below 180 °F (80 °C).
- Use a spray nozzle with a 40 degree wide angle spray pattern.
- Keep the nozzle **at least 1 Meter** (1000 mm) away from and perpendicular (at 90 degrees) to the graphic.

IMPORTANT NOTE- *Holding the nozzle of a pressure washer at an angle to steep may cause the edges of the graphic to lift.*

DIFFICULT CONTAMINANTS

- Soften difficult contaminants such as bug splatter, bird droppings, tree sap and similar contaminants by soaking them for several minutes with very hot, soapy water.
- Rinse thoroughly and dry.
 - If further cleaning is needed, test one of these products in an inconspicuous area to ensure no damage to the graphics:
 - Meguiar's Gold Class™ Bug and Tar Remover or
 - 3M™ Citrus Base Cleaner.
 - Isopropyl alcohol (IPA) (two parts IPA to 1 part water) or denatured alcohol may also help.
- Spot clean the contaminants. Do not use rough scrubbing or abrasive tools, which will scratch the film. Wash and rinse off all residue immediately.

FUEL SPILLS

Wipe off immediately to avoid degrading the vinyl and adhesive. Then wash, rinse and dry as soon as possible.

FILM RESTORATION

The following restoration recommendations will help keep your vehicle wraps looking their best.

- Do not use any abrasive polishes or cutting compounds.
- Do not use any polishing or wax products on matte or textured films.
- Use if there is wax or wax residue on the surface, remove with an all-purpose cleaner.

IMPORTANT NOTE- *Do not allow cleaning solution to soak and immediately rinse with clean water.*

STORE INDOORS OR UNDER COVER WHENEVER POSSIBLE

Vinyl graphics (just like paint) are degraded by prolonged exposure to sun and atmospheric pollutants, particularly on the horizontal surfaces such as bonnet, boot lid and roof. Whenever possible, store in a garage or at least in a shaded area during the day. At night protect the car from dew or rain, which may contain acidic pollutants (a common problem in many large metropolitan areas). When a garage is not available, consider using a cloth car cover at night. If your graphics start to discolour or turn brown, immediately remove the graphics from the vehicle to avoid staining the underlying paint.
